### Presseinfo

„Urban Echoes – Part One“ is Luzid’s second release following its predecessor “Spirit of a Day”. With the intention of transferring their infectious on stage energy into the recording process Luzid have created six powerful songs which delightfully drift between rock, metal and pop.

While the musical diversity ranges from the dark and heavy “Shining”, to the poignant ballad-like “Scars” and the hymnal closer “Volunteer” there is always a golden thread shimmering through the weave. The effortless alternation between gritty resonance and softer introspection and between heavy guitar riffs and fragile melodies is as typical of the “lucid” sound as is the sweet melancholy woven into it.

Luzid represents the emotional semaphore of urban souls whose individuality dissipates within the crowd, lost in lonely thought in the midst of the city sprawl.

„Urban Echoes – Part One“ takes their thoughts, dreams and aspirations and places it into a musical context in order to make these voices heard.
